

7054 USB Hi-Speed Isolator

World's first fully integrated solution

Intona

Signal Processing Devices
Made in Germany

- Sound quality improvement due to true galvanic isolation
- Removes common mode and ground noise
- Eliminates packet noise
- Industrial Version with extended isolation up to 2500 V_{RMS}
- USB repacketizing and reclocking (12 ps Data Jitter)
- Internal low noise linear power supply
- Built on massive parallel FPGA technology
- Intona has a strong background in professional audio and industrial communication systems

7054 USB Hi-Speed Isolator

World's first fully integrated solution

Intona

Signal Processing Devices
Made in Germany

In use the Isolator is delivering noticeably quieter signal and this has opened up the sound dynamics, which I am much enjoying.

Dr. Richard Varey, TNT Audio, review Dec. 2016

A magical device to improve your DAC.

Philippe Watel, musichi, review May 2016

It does exactly what it says...
Cheers to german engineering.

Srajan Ebaen, 6moons.com, Audio Review Nov. 2016

Highly, highly recommended.

Andre Marc, audio video revolution

Music played through the High-Speed Isolator just seemed to be more alive and less veiled sounding.

Steve Plaskin, Audiostream, review May 2016
